

## Four Great Reasons Why Your Family's School Day Should Begin and End on the Bus

- ✓ **Safety.** School buses are 40 times safer than the family car, says the National Transportation Safety Council. Breck's extensive driver training program exceeds state requirements, our buses are constantly inspected, and our drivers are Breck employees, not anonymous contractors.
- ✓ **Convenience.** We offer morning, afternoon and activity bus service, rides to off-campus after-school activities and flexible arrangements for dual-household families. And we continually add centralized pickup and drop-off locations so that more students can be "last on first off" riders.
- ✓ **Affordability.** The average two-way Breck transportation charge is \$1,760. Compare that to the cost of using carline twice a day: anywhere from \$2,700 to more than \$5,000, depending on what you drive and where you live.\*
- ✓ **Going Green.** Every bus in the Breck fleet is five years old or newer, with cleaner emissions than some cars . . . and every student rider reduces the traffic, emissions and waste of two round-trip drives to school every day for drop-off and pickup.

To find out more about routes, ride times and fees, please contact Mark Ryks in the Transportation Office (763-381-8218 or [mark.ryks@breckschool.org](mailto:mark.ryks@breckschool.org)).
